

**NOVEMBER 30, 2022  
NATIONAL COMPUTER SECURITY DAY**

**WHEREAS**, computer security is the protection of computer systems and information from harm, theft, and unauthorized use, and it is the safe and responsible use of information and communication technology; and

**WHEREAS**, National Computer Security Day demands our attention every November 30 because cyber security affects everything from where we bank and how we spend our money to who we elect to public office; and

**WHEREAS**, According to a 2004 “Networld” article, “November 30 was chosen for Computer Security Day so that attention on computer security would remain high during the holiday season – when people are typically more focused on the busy shopping season than thwarting security threats.

**NOW, THEREFORE**, I, Thom Kolupski, Mayor of the City of Seabrook on behalf of the City Council, citizens and employees of the City do hereby proclaim November 30, 2022 as National Security Day, and encourage residents to use this day to find out all you can about common sense ways to stay safe in cyberspace.

**IN WITNESS WHEREOF**, I do hereby set my hand and cause the seal of the City of Seabrook to be affixed this 15<sup>th</sup> day of November, 2022.

A handwritten signature in blue ink, which appears to read "Thomas G. Kolupski". The signature is written in a cursive style.
